

Visual story:

Accessing the 'WA Treasures' Exhibit.

A step-by-step visual and written guide for visitors attending the 'WA Treasures' exhibit.

What is a Visual Story?

Visual stories are simple and easy to follow. They help people get ready for new places or situations by making things more predictable.

**This makes the process feel familiar
and reduces anxiety and stress.**

Welcome to the 'WA Treasures' exhibition. A treasure trove of unique and often surprising objects that have found their way to Western Australia through often surprising means.

Located in the beautiful Hackett Hall, these treasures are placed in an ideal heritage location for your viewing.

The Hall is spacious and full of light, ideal to wander and enjoy. There is plenty of space for wheelchairs and prams.

There is so much information to read about, at the touch of a screen!

Come and look over head, and meet Otto, the 24 metre blue whale skeleton, which was discovered washed ashore in 1898.

There is also a taxidermised American Bison to look at.

There are many more objects to discover of WA History. Come and enjoy, and afterwards explore the rest of the Museum.
