Join us for cosmic-themed school holiday fun at the Museum of Geraldton

These winter school holidays the Museum of Geraldton invites you on a journey into the night sky with a range of cosmic-themed drop-in activities for adventurers of all ages!

Inspired by the *Cosmic Echoes: A Shared Sky Indigenous Art Exhibition*, on display at the Museum of Geraldton from Saturday 4 July to Sunday 6 September 2026, this year's winter program explores connections between modern science and ancient wisdom.

For those who love a challenge, eight Museum objects have been transformed into constellations for clever-minds to decode on an epic Museum-wide Star Trail.

Stargaze at any time of the day or night with a free craft activity from the International Centre for Radio Astronomy Research, featuring iconic southern-sky constellations like Orion and the Southern Cross.

Young artists can try their best at recreating one of the out-of-this-world artworks featured in *Cosmic Echoes*, with a special colour-by-numbers activity developed by CSIRO and SKAO.

With a wide range of activities created by SKAO, including egg painting with Wajarri artist Kurt McIntosh, there's plenty to discover, create and explore at the Museum of Geraldton these school holidays.

School Holiday activities include:
